Hi Steve:

Thanks for the information about Malibu High School. I'm glad their air levels are already below the public health levels.

Ex. 5 - Deliberative

But,
we appreciate you thinking about us.

I hope your work with the school goes well. Please let us know if there is any information we can provide that might be useful.

Best wishes,

Kent Thomas

Subject: PCBs in Malibu High School

Ex. 5 - Deliberative Process

They
conducted air sampling, wipe sampling, and caulk sampling. Air levels are fairly low (below the school standards), there may be 4 wipe samples above the regulatory standard, and they have caulk above 50. Believe it is all congener data (no arochlors).
